

33kW String Inverter Parameters

Which string inverter is best for C& I power plants?"n + 1" Flexible Configuration, Lower Cost IP66 Protection and C5 Anti-Corrosion, Higher Protection For C& I power plants, Sungrow provides 33kW ~ 110kW power level string inverters to adapt to a wide range of applications. What is a PVS string inverter?This new PVS string inverter family, with power ratings of up to 33 kW, has been designed with the objective to maximize the ROI in commercial and industrial applications such as rooftop plants, carports and trackers. What is Sungrow string inverter series sg33/40/50/110cx?Sungrow provides its new string inverter series SG33/40/50/110CX covering complete application scenarios, which comprehensively considering the overall system cost, power generation efficiency, return of investment and O& M, so as to ensure that the power plant operates efficiently and get higher benefits. Which commercial inverters are used in A 500KW rooftop PV plant?Figure 6 shows the commercial inverters SG110CX are used in a 500kW rooftop PV plant in Germany. With no derating at scorching heat, they significantly improve power generation efficiency and power output of the plant. Fig.5 High Protection Rating Adapts to Harsh Environments Fig.6 AC 500kW Rooftop PV Plant in Germany What are the features of Sungrow Power supply inverter?The inverter adopts polyester resin spraying, 316 stainless steel external fastener, 480 hours strict test, and reaches C5 anti-corrosion level. Multiple high-level protection can easily cope with all kinds of harsh environments. Fig.4 Flexible Configuration of Commercial and Industrial PV Plants Sungrow Power Supply Co., Ltd. How can N high-power string inverters & 1 low-power inverter reduce the cost?The flexible configuration of "n high-power string inverters + 1 low-power string inverter" can reduce the system cost effectively. In recent years, more and more PV power plants have been installed in coastal and desert areas which poses challenges to inverters.
