

## Congo (Kinshasa) 5G base station civilian electricity prices

What is the electricity price in Democratic Republic of the Congo? The residential electricity price in Democratic Republic of the Congo is CDF 166.611 per kWh or USD 0.057. The electricity price for businesses is CDF 194.400 kWh or USD 0.067. These retail prices were collected in September and include the cost of power, distribution and transmission, and all taxes and fees.

What is the main priority for the Democratic Republic of Congo's power sector? The main priority for the Democratic Republic of Congo's power sector is to increase access to electricity. The Democratic Republic of Congo is a large country with 10 million households of which 1.6 million have access to electricity. This makes it the third largest population in the world without access to electricity.

How much electricity does Kinshasa use? Residential electricity consumers are concentrated in Kinshasa and a few other large cities in the South or along the Eastern border with Rwanda and Uganda. Average annual demand per capita in Kinshasa is estimated at around 380 kWh, compared with around 330 kWh in Southern cities and 290 kWh in Eastern cities.

How will rising demand affect electricity service in Kinshasa? If this rising demand is not met with an increase in supply and improvements to electricity infrastructure, it will lead to further deterioration of electricity service. In Kinshasa, while 60% of the population has access to electricity, service quality and reliability is very poor.

Why does Kinshasa have a low power supply? This is due mainly to the saturation of the Kinshasa distribution grid and capacity limitations for Inga 1 and 2 power plants. Power injected into the network is currently limited to about 500 MW, whereas peak demand is estimated at MW9.

Does metering affect electricity consumption in Kinshasa? A campaign to install conventional and prepayment meters for 22,900 new connections was carried out in the Kimbanseke and Kisenso districts of Kinshasa. Moreover, electricity connections are made by land plot containing several customers, but because of lack of metering, actual consumption is unknown.
