

## Construction of new energy storage project in Croatia

Croatia first grid-scale battery storage and virtual power plantThe European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established Plans announced for 245 MWh of battery storage projects in The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 Croatia building first grid-connected battery storage near SibenikCroatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's Croatia battery storage: Impressive 60 MW System BackedThe project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik. Croatia to earmark EUR 500 million for batteriesThe Government of Croatia is preparing EUR 500 million for the installation of batteries for storing renewable energy. Minister of Economy and Sustainable Development Damir Habijan said Croatia is ready for EBRD Backs Croatia's Clean Energy Transition with EUR16.8 Million The project aims to install up to 60 megawatts of grid-connected battery storage capacity and deploy an advanced virtual power plant platform capable of balancing electricity Croatia Power Company Energy Storage Project A Blueprint for As Croatia accelerates its renewable energy adoption, the Croatia Power Company Energy Storage Project emerges as a critical solution to balance supply fluctuations. FER Takes Key Role in Battery Storage Study for Croatia's Over 50% of Croatia's transmission grid has exceeded its design lifespan, and its modernization requires both time and significant investment. At the same time, the energy Croatia Bolsters Energy Resilience with EUR500 The forthcoming battery storage facilities are intended to provide a buffer for electricity generated from renewable sources, allowing for more flexible energy management without the immediate need to feed Croatia looks to fund 20MWh of energy storage In April, Croatia and its neighbour Slovenia started a trial project looking at how a five-hour duration battery storage system could increase grid flexibility in both countries, in another EU-financed project.Croatia first grid-scale battery storage and virtual power plantThe European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established Plans announced for 245 MWh of battery storage projects in Croatia The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia.
