

Containerized solar guide signs

Should you choose a solar solution to illuminate signs? Opting for a solar solution to illuminate signs is an ideal option as it reduces the initial expenses of trenching and connecting grid power to the sign, lowers maintenance costs, and enables the speedy completion of the sign project. Best of all, there are no added energy bills! Are solar-powered sign lights sustainable? Illuminate your signs sustainably with SEPCO's commercial solar-powered LED sign lights. Our innovative solar solutions eliminate the need for traditional utility power, providing significant cost savings by removing the necessity for trenching electric wires, and eliminating ongoing electricity bills. What is sunsign Ani? Sunsign Introduces its New Weatherproof Series of Signage Powered by the Sun. This signage features Advanced Night Illumination (ANI), 100% Solar Powered, Portable Signs that will Revolutionize the Sign Industry. Where can a sunsign be placed? With no power cords to worry about and an integral wheel option, each sign is fully portable and can be placed practically anywhere, including in roadside areas that often prohibit electrically illuminated signage. Wherever Sunsigns are placed, they always draw attention. How does a solar sign work? Harnessing the power of the sun with two full-sized solar panels, one on each side, maximum charging can occur even on cloudy or overcast days to illuminate the sign visibility into the night. State-of-the-art bright LED backlight lighting and controls provide automatic nighttime turn on. Can sunsigns withstand weather conditions? Sunsigns can stand up to even the harshest weather conditions. Every consideration was taken when designing Sunsigns to withstand rain, snow, heat, and cold. For extremely high wind areas or uneven coarse terrain applications, optional aluminum extendable legs are included and can be utilized. Solar Signs, Solar, Information and Waypoint Provide visitors with informative and critical information with an EcoLiteco solar-powered sign that can be designed, manufactured and delivered in turnkey fashion anywhere in the world. The illuminated signs can be Solar Powered Signs. Signcorp is proud to introduce its new product line of advanced solar powered lighting and signage solutions.
