

Does Côte d'Ivoire have a power grid? The grid is expected to cover 99% of the population by 2025, and 42% of the energy produced will come from renewable sources. That is reassuring news for Côte d'Ivoire. In the wake of the post-electoral crisis of 2011, only 34% of the population had access to electricity. Today, close to 94% of Ivorians are connected to the power grid. Why did Côte d'Ivoire become a leading electricity exporter in West Africa? Those tough years nevertheless provided Côte d'Ivoire with an opportunity to find a unique, innovative energy solution, paving the way for the country to develop the third largest electricity generation system on the continent and become one of the leading electricity exporters in West Africa. How much solar energy is produced in Côte d'Ivoire? Most recently, under the World Bank Group's Scaling Solar Initiative, IFC is supporting the development of two public-private partnerships to generate 60 MW of solar energy. Today, private operators in Côte d'Ivoire are currently responsible for 70% of energy production and 100% of its distribution. Why did Côte d'Ivoire privatize its electricity sector? Côte d'Ivoire's decision to privatize a portion of its electricity sector paved the way for one of the continent's most robust energy systems that continues to expand and innovate with clean energy solutions. This feat would not have been possible without private sector involvement and complex financial packages. Do Ivorians have access to electricity? Whereas only 34% of Ivorians had access to electricity back in 2011 when the post-electoral crisis triggered a 40% decline, close to 94% of Ivorians are now connected to the grid and the most destitute customers benefit from a subsidized rate. How much power does Côte d'Ivoire have? With an installed power capacity of almost 2,230 megawatts (MW), Côte d'Ivoire fully meets its domestic demand and exports the roughly 10% generation surplus to the subregion. Côte d'Ivoire The project's development objective is to increase access to electricity in Côte d'Ivoire, and more specifically in the rural areas of Savanes, Woroda and Zanzan Districts. The secret to Côte d'Ivoire's electric success Today, private operators in Côte d'Ivoire are currently responsible for 70% of energy production and 100% of its distribution. The grid is expected to cover 99% of the population by 2025, and 42% of the energy produced in Côte d'Ivoire Regional Compact Côte d'Ivoire is the third largest energy system in West Africa and a key regional energy exporter. The compact will provide reliable and affordable electricity within West Africa by increasing Côte d'Ivoire's ability to produce renewable energy. Projects & Infrastructure As part of its policy of developing the production of renewable energy, the State of Côte d'Ivoire gives priority to any project involving the production of renewable energy whose production will benefit the People in Côte d'Ivoire. In October, IFC announced an anchor investment of \$48.8 million in a bond that will raise money to subsidize electricity hookups for up to 800,000 low-income households, mostly in Côte d'Ivoire's interior. Inclusive Connectivity: Huawei and the Ministry of Communications of Côte d'Ivoire have joined hands to address the network coverage issue in remote areas of northern Côte d'Ivoire. The project is being funded by the World Bank and aims to improve the Power Grid. Around 68 Billion CFA for Phase 1 of The project involves the construction of climate-resilient infrastructure between the Dunkwa II

substation in Ghana's Central Region and the Bingerville substation in the Grid-connected photovoltaic inverter in Côte d'Ivoire. Can grid-connected PV inverters improve utility grid stability? Grid-connected PV inverters have traditionally been thought as active power sources with an emphasis on maximizing power. Côte d'Ivoire communication base station power equipment. Huawei and the Ministry of Communications of Côte d'Ivoire have joined hands to address the network coverage issue in remote areas of northern Côte d'Ivoire. USTDA, Côte d'Ivoire Partner on Grid "This project not only addresses Côte d'Ivoire's immediate energy needs but also supports regional energy integration and expands opportunities for U.S. companies to provide their technologies and services." Côte d'Ivoire The project's development objective is to increase access to electricity in Côte d'Ivoire, and more specifically in the rural areas of Savanes, Woroba and Zanzan Districts. The secret to Côte d'Ivoire's electric success Today, private operators in Côte d'Ivoire are currently responsible for 70% of energy production and 100% of its distribution. The grid is expected to cover 99% of the Côte d'Ivoire Regional Compact. Côte d'Ivoire is the third largest energy system in West Africa and a key regional energy exporter. The compact will provide reliable and affordable electricity within West Africa. Power to the People in Côte d'Ivoire In October, IFC announced an anchor investment of \$48.8 million in a bond that will raise money to subsidize electricity hookups for up to 800,000 low-income households. Inclusive Connectivity: Huawei RuralStar Empowers Huawei and the Ministry of Communications of Côte d'Ivoire have joined hands to address the network coverage issue in remote areas of northern Côte d'Ivoire. The project is being funded USTDA, Côte d'Ivoire Partner on Grid Strengthening - USTDA "This project not only addresses Côte d'Ivoire's immediate energy needs but also supports regional energy integration and expands opportunities for U.S. companies to provide Côte d'Ivoire The project's development objective is to increase access to electricity in Côte d'Ivoire, and more specifically in the rural areas of Savanes, Woroba and Zanzan Districts. USTDA, Côte d'Ivoire Partner on Grid Strengthening - USTDA "This project not only addresses Côte d'Ivoire's immediate energy needs but also supports regional energy integration and expands opportunities for U.S. companies to provide
