

Double glass panels for household use

Insulated glass panels consist of two panes of tempered glass separated by a spacer. The space between the two panes of glass is filled with air, which provide insulation. These are most often used in residential window applications. Also known as: Insulated glass units, Double pane windows, Double glazed units, Sealed Glass Units, Replacement dual pane window units. This product consists of two panes of tempered glass separated by a spacer. The space between the two panes of glass is filled with air. These are most often used A double pane, also known as double-glazed or insulated glass, refers to a window or glass panel that consists of two layers of glass separated by a space filled with air or inert gas, such as argon. These layers are sealed together around the edges to create a single unit. Double pane windows Order our insulated glass panels online and invest in your home's Comfort, energy efficiency, and value.
