

## Energy Storage Project Inquiry

What is energy storage?Energy storage encompasses an array of technologies that enable energy produced at one time, such as during daylight or windy hours, to be stored for later use. LPO can finance commercially ready projects across storage technologies, including flywheels, mechanical technologies, electrochemical technologies, thermal storage, and chemical storage. How many energy storage projects are there in the world?It has 9.4GW of energy storage to its name with more than 225 energy storage projects scattered across the globe, operating in 47 markets. It also operates 24.1GW of AI-optimised renewables and storage, applied in some of the most demanding industrial applications. What is Europe's largest battery storage project?It was billed as Europe's largest battery storage project when it became operational at the end of and was revolutionary thanks to its technology providing a range of benefits to the wider electricity system, including absorbing energy then releasing it to meet demand. 6. Fluence Advancion Energy Storage Systems Why is energy storage important?Energy storage plays a pivotal role in the energy transition and is key to securing constant renewable energy supply to power systems, regardless of weather conditions. Energy storage technology allows for a flexible grid with enhanced reliability and power quality. What is the difference between manufacturing and deployment of energy storage systems?Manufacturing: Projects that manufacture energy storage systems for a variety of residential, commercial, and utility scale clean energy storage end uses. Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses. Which energy companies are supplying battery energy storage systems?Energy trading company Foxwell Power (FWP) has contracted Saft to supply a battery storage solution for a 356MWh project in Taiwan. Energy Vault has acquired a 150MW battery energy storage system (BESS) in Texas. Meanwhile, Jupiter Power has entered an agreement with Austin Energy to provide 100MW of electricity from a BESS facility.
