

Energy Storage Project Subcontracting Plan

What is the best practice guide for energy storage projects? This Best Practice Guide covers eight key aspect areas of an energy storage project proposal. This Guide documents the industry expertise of leading firms, covering the different project components to help reduce the internal cost of project development and financing for both project developers and investors. What is the advancing contracting in Energy Storage Working Group? The Advancing Contracting in Energy Storage (ACES) Working Group is an independent industry led and funded effort founded to develop a best practice guide for the energy storage project development community. How do energy storage contracts work? For standalone energy storage contracts, these are typically structured with a fixed monthly capacity payment plus some variable cost per megawatt hour (MWh) of throughput. For a combined renewables-plus-storage project, it may be structured with an energy-only price in lieu of a fixed monthly capacity payment. What are the operational limitations of energy storage? Operating Limitations: Energy storage resources may be subject to operational constraints that do not affect traditional generation projects. For example, certain battery technologies will degrade more quickly if the state of charge is not actively managed within a certain range. Can energy storage resources be financed on a nonrecourse basis? Key Finance-ability Provisions: Energy storage resources may also be financed on a nonrecourse basis and, like any other project financed in such manner, will need to address issues upon which nonrecourse lenders will focus, including assignment, events of default, performance requirements, key dates, and collateral. What is a PPA for new energy storage resources? Some PPAs for new energy storage resources have been structured as capacity-only contracts in which the developer is responsible for the sale of energy and all costs associated therewith--including the costs of the required energy procured from the utility.
