Where should energy storage systems be protected? Rooms and areas containing energy storage systems shall be protected on the system side as follows: 1. In dedicated use buildings, fire-resistance rated assemblies shall be provided between rooms and areas containing energy storage systems and areas in which administrative and support personnel are located. What should be included in an energy storage plan? The plan shall include details on providing a safe and orderly shutdown of the energy storage system that includes the following: 1. A narrative description of the activities to be accomplished for removing the energy storage system from service, and from the facility in which it is located. 2. What is the battery energy storage system guidebook? The Battery Energy Storage System Guidebook (Guidebook) helps local government officials, and Authorities Having Jurisdiction (AHJs), understand and develop a battery energy storage system permitting and inspection processes to ensure efficiency, transparency, and safety in their local communities. Where should energy storage systems be located? Energy storage systems and associated equipment shall be located from the edge of the roof a distance equal to at least the height of the system, equipment, or component but not less than 5 feet (1.5 m). 4. What is a battery energy storage system electrical checklist? The Battery Energy Storage System Electrical Checklist provides an overview of common points of inspection for which the applicant should be prepared to show compliance. Page 3 of 5 o One or Three-Line Diagram - Show grounding and bonding for the battery energy storage system, including the ground return path. - Show method of interconnection. How should a battery energy storage system be maintained? Battery energy storage systems shall be maintained in good working order and in accordance with industry standards. Site access shall be maintained, including snow removal at a level acceptable to the local fire department and, if the Tier 2 Battery Energy Storage System is located in an ambulance district, the local ambulance corps.
