

## Greece Battery Energy Storage Project

---

The 200 MW auction is the final phase of a program aiming to subsidize the development and operation of large-scale, in-front-of-the-meter batteries. The initial program asked for 1 GW of battery capacity to be tendered in three separate procurement exercises of 400 MW, 300 MW and 300 MW. Greece's latest auction has awarded subsidies to 188.9 MW of standalone, front-of-the-meter, utility-scale battery energy storage. The auction was the third and final edition of a battery storage subsidy program launched in 2018, with the country now turning its focus towards a new 4.7 GW target. The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under three previous auctions. The new plan, prepared by the Ministry of the Environment and Energy, calls for Battery Energy Storage Systems (BESS) in Greece to transition from early-stage pilots to critical infrastructure, driven by a rapidly maturing regulatory framework and increasing investor appetite. Multiple large-scale projects are now underway, providing a clearer view of which revenue models will be used. Greece awards 189 MW of battery storage in third auction. Greece's Regulatory Authority for Energy, Waste, and Water (RAAEY) has published the results of the country's third auction for standalone battery energy storage system. Greece presents 3.5 GW of standalone battery storage. The Greek Ministry of Energy and Infrastructure has increased its target for a merchant standalone battery energy storage system (BESS) rollout to 3.55 GW against the background of rising costs. Greece plans 4.7 GW of commercial battery storage. The much-awaited ministerial decree for zero-subsidy standalone battery systems has been published in Greece. So far, Greece has provided support to 900 MW of standalone storage projects under Greece to Host Landmark 330 MW Battery Energy Storage. A new large-scale battery energy storage project planned by Metlen and the Karatzis Group in Thessaly is set to become a landmark development for Greece's energy sector. Greece: 27GW of battery storage projects gear up. The database tracks the deployment of storage across 28 countries, detailing the companies involved in each project and their role, as well as project technologies, milestones, segments and technical details. Powering Greece's Energy Future: Battery Storage Projects Are Battery Energy Storage Systems (BESS) in Greece to transition from early-stage pilots to critical infrastructure, driven by a rapidly maturing regulatory framework and PPC develops battery storage projects in Greece. PPC Group advanced two battery energy storage system (BESS) projects in Western Macedonia, northern Greece. The "Melitis 1" project will have an installed capacity of 189 MW. Karatzis, Metlen to install Greece's largest battery in joint venture. Karatzis Group of Companies and Metlen are establishing a joint venture for a standalone battery energy storage system (BESS) of 330 MW and 790 MWh. It is the biggest ELSEWEDY ELECTRIC Secures Greece's First Large-Scale This groundbreaking project will address the increasing need for reliable and flexible energy storage solutions, providing critical support for Greece's grid and improving Greece's 4.7 GW Battery Storage Boom. Discover the investor rush for Greece's 4.7 GW battery storage units as the government releases its ministerial decision. Learn about the opportunities and challenges Greece awards 189 MW of battery storage in third auction. Greece's Regulatory Authority for Energy, Waste, and Water (RAAEY) has
