

## Hungary on energy storage systems

---

The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. Hungary's largest operating standalone battery energy storage system (BESS) has been inaugurated today: MET Group put into operation a battery electricity storage plant with total nominal power output of 40 MW and storage capacity of 80 MWh (2-hour cycle). It is the latest example in a series of MET Group, a Switzerland-based European energy company, has inaugurated Hungary's largest standalone battery energy storage system (BESS) at the Dunamenti Power Station in Székesfehérvár. The facility features a nominal power output of 40 MW and a storage capacity of 80 MWh, enabling a 2-hour Met Duna Energia (a unit of the MET Group, an energy company based in Switzerland with Hungarian roots), has inaugurated a 40 MW / 80 MWh battery storage at the Dunamenti Power Plant in Székesfehérvár (South of Budapest). Operation has started at the storage system. The investment is supported by the Hungarian government. The Hungarian government has allocated HUF 62 billion (EUR 158 million) for energy storage projects with an overall 440 MW in operating power. Hungarian authorities launched the tender for grid-scale batteries on January 15 and received offers until February 5. The winning bidders were selected by the Swiss energy company MET Group has inaugurated the largest stand-alone electricity storage system in Hungary's history. The new installation, located at the Dunamenti power plant in Székesfehérvár near Budapest, has a rated power output of 40 MW and an energy storage capacity of 80 MWh. The Hungary's subsidy scheme for energy storage will drive huge growth in battery energy storage system (BESS) deployments over the next few years. Hungary has 40MWh of grid-scale BESS online today but that will jump 3,400% to around 1,300MWh over the next few years thanks to opex and capex support. MET Group inaugurates Hungary's largest battery. Hungary's largest operating standalone battery energy storage system (BESS) has been inaugurated today: MET Group put into operation a battery electricity storage plant with total nominal power output of 40 MW. MET Group Unveils Hungary's Largest Battery Storage Plant. MET Group has launched Hungary's largest battery energy storage system at the Dunamenti Power Station, a 40 MW / 80 MWh plant supporting national energy transition goals. Hungary's largest battery storage facility comes online. Swiss-based energy company MET Group has officially inaugurated Hungary's largest standalone battery energy storage system (BESS) at its Dunamenti Power Station in Székesfehérvár, located Hungary powers up largest battery storage system. Hungary has just switched on its largest battery energy storage system (BESS) to date, stepping up its role in Central Europe's growing grid-scale energy transition. MET Group inaugurates Hungary's biggest battery. Hungarian oil and gas company MOL has started the construction of a 20 MW / 40 MWh energy storage in Algyo (South Hungary). Hungary Activates Largest Battery System Near Budapest. By enhancing grid stability, optimizing the use of renewable energy, and providing backup power during peak demand, battery storage is poised to become an indispensable part of Hungary's energy future. Hungary awards EUR 158 million for 440 MW of Hungarian authorities
