

## Mature energy storage projects in Montenegro

EPCG has identified four locations for the installation of the BESS: two sites at the Perucica hydroelectric station and the Pljevlja thermal power plant, each set to host 60 MWh of storage. Additionally, the planned 5-MW Kapino Polje solar farm will feature a 5-MWh BESS. The utility is procuring two grid-scale battery storage systems to the tune of EUR 48 million (\$55.9 million). EPCG, Montenegro's largest electricity provider, is investing in two four-hour battery energy storage systems (BESS) to strengthen grid resilience and balance supply and demand. Each Montenegro has taken a decisive step toward modernizing its power system with a EUR48 million investment in large-scale battery energy storage systems (BESS). State-owned utility Elektroprivreda Crne Gore (EPCG) has launched an international tender for two commercial and industrial energy storage EPCG's latest project aims to address these gaps, positioning battery storage as a cornerstone of grid modernization and a critical tool for achieving national sustainability targets. Montenegro's energy landscape reflects a blend of historical reliance on hydropower, particularly through Montenegro's state-owned power utility Elektroprivreda Crne Gore (EPCG) has invited bids for the design, supply, installation and commissioning of two battery energy storage system (BESS) facilities of 30 MW each, with a capacity of 120 MWh apiece. The procurement, valued at EUR 48 million (USD Montenegro's state-owned power utility, Elektroprivreda Crne Gore, has launched a tender for the procurement and installation of two battery energy storage systems with a total capacity of 60 MW/240 MWh. Elektroprivreda Crne Gore (EPCG) is seeking a partner for the design, supply, installation Montenegro's power utility, Elektroprivreda Crne Gore (EPCG), is preparing to open a significant tender for the procurement of battery energy storage systems (BESS) with a total capacity of 240 MWh. This initiative is part of the country's broader strategy to enhance its energy infrastructure and Montenegro utility launches 240 MWh battery The batteries will be installed at the site of the metal processing company EPCG Zeljezara Niksic. The tender covers the full project scope - including design, equipment supply, construction, Montenegro Launches 240 MWh Battery Energy Storage Montenegro invests EUR48M in 240 MWh battery energy storage systems to enhance grid stability and accelerate its renewable energy transition. How Will Montenegro's New Battery Systems Boost Energy Grid?Establishing pilot programs for next-generation storage technologies might also position Montenegro at the forefront of energy innovation in the region. Additionally, fostering Montenegro's utility EPCG invites bids for 60-MW Montenegro's state-owned power utility Elektroprivreda Crne Gore (EPCG) has invited bids for the design, supply, installation and commissioning of two battery energy storage system (BESS) facilities of Montenegro's power utility seeks contractor for two battery Montenegro's state-owned power utility, Elektroprivreda Crne Gore, has launched a tender for the procurement and installation of two battery energy storage systems with a total Montenegro's EPCG Set to Launch Major Battery The opening of this tender is a pivotal moment for Montenegro as it seeks to modernize its energy infrastructure and reduce its carbon footprint. By investing in battery energy storage, EPCG is positioning itself Montenegro's First Battery Energy Storage Systems As the largest producer of

## Mature energy storage projects in Montenegro

electricity in Montenegro and a key developer of renewable energy projects, EPCG aims to improve the flexibility of the power system by Montenegro labels 15 energy projects as The Government of Montenegro has adopted a list of priority infrastructure projects for the energy sector to fulfill the final criteria of chapter 21 - Trans-European Network, of the country's negotiations on the Montenegro utility launches 240 MWh battery storage tenderThe tender covers the full project scope - including design, equipment supply, construction, commissioning, personnel training, and maintenance. Montenegro: EPCG to procure 300 MWh of battery storage Montenegro's state-owned electric utility, Elektroprivreda Crne Gore (EPCG), announced plans to launch a call for tenders to procure 300 MWh of battery energy storage Montenegro utility launches 240 MWh battery storage tenderThe batteries will be installed at the site of the metal processing company EPCG Zeljezara Niksic. The tender covers the full project scope - including design, equipment Montenegro's utility EPCG invites bids for 60-MW BESS projectMontenegro's state-owned power utility Elektroprivreda Crne Gore (EPCG) has invited bids for the design, supply, installation and commissioning of two battery energy Montenegro's power utility seeks contractor for two battery storage Montenegro's state-owned power utility, Elektroprivreda Crne Gore, has launched a tender for the procurement and installation of two battery energy storage systems with a total Montenegro's EPCG Set to Launch Major Battery Energy Storage The opening of this tender is a pivotal moment for Montenegro as it seeks to modernize its energy infrastructure and reduce its carbon footprint. By investing in battery Montenegro labels 15 energy projects as infrastructure prioritiesThe Government of Montenegro has adopted a list of priority infrastructure projects for the energy sector to fulfill the final criteria of chapter 21 - Trans-European Network, of the Montenegro: EPCG to procure 300 MWh of battery storage Montenegro's state-owned electric utility, Elektroprivreda Crne Gore (EPCG), announced plans to launch a call for tenders to procure 300 MWh of battery energy storage
