

## Moldova's latest energy storage policy

State Secretary of the Ministry of Energy Constantin Borosan, at the EU4Energy Policy Forum in Copenhagen, has unveiled the vision of Moldova regarding the development of a sustainable energy system, with a focus on increasing energy storage capacities and integrating State Secretary of the Ministry of Energy Constantin Borosan, at the EU4Energy Policy Forum in Copenhagen, has unveiled the vision of Moldova regarding the development of a sustainable energy system, with a focus on increasing energy storage capacities and integrating renewable sources. According Moldova's Ministry of Energy has launched public consultations on a draft Energy Strategy , described as the country's most ambitious in three decades, the ministry announced on September 12. The plan foresees a EUR43bn investment programme -- equivalent to 2.5 times Moldova's GDP in but While today's final energy mix in the Republic of Moldova still heavily depends on fossil fuels and biomass, more ambitious climate mitigation policies are expected to lead to greater energy savings and a shift to lower carbon technology options. To reach net-zero, deep electrification across the The Government has approved the Action Plan to strengthen Moldova's energy independence. The document provides for major investments in infrastructure, increasing local electricity production capacity, including from renewable sources, creating natural gas and oil reserves, and integrating energy Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a capacity of 75 MW and internal combustion engines (ICE) with a capacity of 22 MW to strengthen the country's energy security. The United States Agency for International Development (USAID), through the Moldova State Secretary of the Ministry of Energy Constantin Borosan, at the EU4Energy Policy Forum in Copenhagen, has unveiled the vision of Moldova regarding the development of a sustainable energy system, with a focus on increasing energy storage capacities and integrating renewable s State Secretary Energy ministry official says Moldova develops State Secretary of the Ministry of Energy Constantin Borosan, at the EU4Energy Policy Forum in Copenhagen, has unveiled the vision of Moldova regarding the development of a sustainable energy system, with bne IntelliNews The strategy aims to strengthen energy security, reduce greenhouse gas emissions and align Moldova with European sustainability standards. If fully implemented, the ministry estimates Situation of the today's Energy and Transport systems of While today's final energy mix in the Republic of Moldova still heavily depends on fossil fuels and biomass, more ambitious climate mitigation policies are expected to lead to greater energy The Integrated National Energy and Climate Plan The Integrated National Energy and Climate Plan (INECP) -, which represents a concrete action plan to achieve the country's decarbonization objectives, was approved today at the Cabinet of Moldova unveils EUR43bn energy strategy to focused onKey measures include eliminating coal consumption by and sharply reducing the use of natural gas and petroleum products. Installed power capacity is projected to exceed 5,000 MW Moldova aims for energy independence by The document provides for major investments in infrastructure, increasing local electricity production capacity, including from renewable sources, creating natural gas and oil Moldova Secures \$85M U.S. Grant for Cutting Moldova will purchase a state-of-the-art Battery Energy Storage System (BESS) with a
