

## New Energy Storage Facility Project

The 20-MW facility installed and operated by the New York Power Authority connects into the state's electric grid, and is meant to relieve transmission congestion and pave the way for the utility industry and the private sector to better understand how to integrate more clean energy into the power system, especially during times of peak demand. Governor Hochul Announces New York's First Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County. NYCEDC Advances Green Economy Action Plan with Support of The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the NYPA Utility-Scale Battery Energy Storage Project is Now Operating New York Gov. Kathy Hochul on Aug. 25 announced that New York's first state-owned utility-scale battery energy storage project is now operating in Franklin County, N.Y. Governor Hochul Announces New York's First State-Owned Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County. NYPA Utility-Scale Battery Energy Storage Project is Now Operating New York Gov. Kathy Hochul on Aug. 25 announced that New York's first state-owned utility-scale battery energy storage project is now operating in Franklin County, N.Y. One of the nation's largest battery energy storage sites is coming One of the country's largest battery energy storage sites is about to be built on Staten Island, but families say by the time they learned of the plan, it was already a done deal. New York's first state-owned energy storage project now operational It is the first utility-scale battery energy storage project in the state and the Power Authority's first utility-scale battery project. The storage plant consists of five 53-foot walk-in Support of Major Battery Energy Storage Project in New York City The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the KCE NY 1 Breaks Ground on 20 MW The project is the largest lithium-ion battery storage project in New York State and supports Governor Cuomo's commitment for the state to reach 1,500 megawatts of energy storage by New York regulator approves 110MW BESS as state A 110MW/440MWh battery storage project in New York has been given the green light by regulators, ahead of the launch of tenders which could create a significant market NY's first state-owned utility-scale energy storage system now The Northern New York Energy Storage Project will serve as a model for future storage systems in a region heavily powered by renewable energy. The project also will help New York bets on long-duration energy storage with \$15M award New York Gov. Kathy Hochul, D, has issued nearly \$15 million in funding to four long-duration energy storage demonstration projects, the New York State Energy Research Governor Hochul Announces New York's First State-Owned Governor Kathy Hochul today announced that New York's first state-owned utility-scale battery energy storage project is now operating in the North Country's Franklin County. New York bets on long-duration energy storage with \$15M award New York Gov. Kathy Hochul, D, has issued nearly \$15 million in funding to four long-duration energy storage demonstration projects, the New York State
