

## New Energy Storage Pool

How will energy storage affect New York's energy grid? In June, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. Storage will increase the resilience and efficiency of New York's grid, which will be 100% carbon-free electricity by 2035. Additionally, energy storage can stabilize supply during peak electric usage and help keep critical systems online during an outage. What is New York state's energy storage plan? New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid. Additionally, these projects will provide meaningful benefits to Disadvantaged Communities and Low-to-Moderate Income New Yorkers. What is New York State's first bulk energy storage competitive solicitation? Categories: Storage, Energy Policy, Energy Storage, Batteries On July 28, 2023, Governor Kathy Hochul announced the launch of New York State's first bulk energy storage competitive solicitation. What is New York's energy storage roadmap? The Roadmap proposed a comprehensive set of recommendations to expand New York's energy storage programs to cost-effectively unlock the rapid growth of renewable energy across the State and bolster grid reliability and customer resilience. What is New York's energy storage goal? New York's Climate Leadership and Community Protection Act (Climate Act) codified a goal of 1,500 MW of energy storage by 2025 and 3,000 MW by 2030. In June, New York's Public Service Commission expanded the goal to 6,000 MW by 2030. Does New York need multi-day energy storage? New York needs 4.8 GW of multi-day storage by 2030 and 35 GW by 2040 to reliably integrate renewables and achieve decarbonization goals. This study identified a 4.8 GW need for multi-day energy storage in the least-cost portfolio, which grows to 35 GW by 2040. New York PSC approves retail and residential The New York State Public Service Commission has approved the state's retail and residential energy storage implementation. New York approves plan to add six gigawatts of Today New York Governor Kathy Hochul announced that the New York State Public Service Commission has approved a new framework for the state to achieve a nation-leading six gigawatts of energy NYCEDC Advances Green Economy Action Plan with Support of The facility will serve as a large-scale battery energy storage system capable of charging from, and discharging into, the New York power grid. When fully functional, the New York Kicks Off Bulk Energy Storage On July 28, 2023, Governor Kathy Hochul announced the launch of New York State's first bulk energy storage competitive solicitation. Modeling Multi-Day Energy Storage in New York This analysis supplements prior studies and evaluates the extent to which diverse types of emerging long-duration energy storage (LDES) and multi-day energy storage (MDS) NYSEERDA's Retail Energy Storage Program, New York's energy transition continues to plow ahead - the state's new energy storage program makes it possible for everyday landowners to host a grid-scale battery, earn a predictable lease New York's Largest Battery Project Has Been Canceled The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a The Initiative | New Energy New York National Recognition as a Battery and Energy Storage Innovation Hub. We are leading a once-in-a-generation opportunity to connect our region's
