Can a remote base station power supply be uninterrupted?By Zhang Hongguan & Zhang Yufeng Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed. Can off-the-grid energy solutions help remote base stations?Uninterrupted power supply for remote base stations has been a challenge since the founding of the wireless industry, but alternative sources have a chance of succeeding where traditional solutions have failed. With users no longer tolerating spotty coverage in the great outdoors, the need for off-the-grid energy solutions is ever growing. How many power supply combinations are there in a base station?For base stations, there are six power supply combinations-solar-only, solar+diesel, solar+mains, etc. Solar-only When there is sufficient sunlight, photovoltaic cells convert solar energy into electric power. Loads are powered by solar energy controllers, which also charge the batteries. What is a managed base station?Trimble recommends that base stations that are connecting from a portable, daily-use setup are treated as unmanaged base stations and those used for permanent or semi-permanent setups where the receiver will be in the same place for a longer period of time are treated as managed base stations. How do I set up a base station?Set up the base station using either the tripod or T-bar mounting method. You must use an external radio antenna kit for the internal 450 MHz or 900 MHz radio. To avoid interference between the 900 MHz radio and GPRS transmissions, do not mount the external radio antenna within 1 m (3.3 ft) of the GSM antenna. What is onsite power supply?Dual power Traditionally, when power outages are frequent, onsite power supply combines mains, batteries and generators. Normally, the mains supply power while charging the batteries. When the mains fail, batteries take over; diesel generators are only utilized if the batteries prove insufficient. ?????/????????????(?????)
