

## Samoa solar Energy Storage Project

---

In collaboration with Eastern Power Solutions (EPS), a turn-key solar energy service provider, the solar-plus-storage projects will support American Samoa Power Authority (ASPA)'s mission to provide quality, safe, economical, and sustainable utility services to the community of American Samoa. Evlo deploys grid-scale batteries in two American Samoa islandsPositioned less than 1,000 miles south of the equator, American Samoa is positioned to harness its abundant solar energy resources. Energy storage is expected to play EVLO Commissions First of Three Energy Storage Projects in EVLO Energy Storage, a fully integrated battery energy storage systems (BESS) provider and wholly owned subsidiary of Hydro-Qu&#233;bec, on April 15 announced the company ADB, Samoa Sign Landmark Agreement for Solar Power ProjectsADB has signed a transaction advisory services agreement with Samoa's Electric Power Corporation (EPC) to support the development of a solar photovoltaic and battery EVLO commissions first of three BESS projects in The projects will be deployed on the islands of Tutuila and Aunu'u. The other two BESS projects will have capacities of 5MW/10MWh and 1MW/2MWh. All three projects will use the EVLO system, which EVLO Energy Storage Completes First Battery Storage System In collaboration with Eastern Power Solutions (EPS), a leading turn-key solar energy service provider, EVLO has launched this solar-plus-storage initiative in support of the EVLO Commissions First of Three Energy Storage Located on Tutuila and Aunu'u islands, the three solar-plus-storage projects have capacities of 4 MW/8 MWh, 5 MW/10 MWh, and 1 MW/2 MWh. These systems stabilize solar power fluctuations, ensuring Samoa Observer | EPC to set up solar farmsIncorporating cutting-edge battery energy storage systems, the project will improve grid reliability by mitigating intermittencies associated with renewable energy sources. The facilities will smooth electricity EVLO completes commissioning of first of three energy storage EVLO, a fully integrated battery energy storage systems (BESS) provider and wholly owned subsidiary of Hydro-Qu&#233;bec, has completed commissioning of a 4-MW, 8-MWh, The Samoa Phase III Energy Storage Project: Powering a 500 household solar systems acting like a coordinated ballet troupe instead of toddlers with tambourines. That's Samoa's next phase - creating a distributed energy network EVLO Completes Commissioning of First of Three Energy Storage Projects Constructed by Eastern Power Solutions, the solar-plus-storage projects will provide 10 MW / 20 MWh of critical clean capacity for the American Samoa grid. Evlo deploys grid-scale batteries in two American Samoa islandsPositioned less than 1,000 miles south of the equator, American Samoa is positioned to harness its abundant solar energy resources. Energy storage is expected to play EVLO Commissions First of Three Energy Storage Projects in American SamoaEVLO Energy Storage, a fully integrated battery energy storage systems (BESS) provider and wholly owned subsidiary of Hydro-Qu&#233;bec, on April 15 announced the company EVLO commissions first of three BESS projects in American SamoaThe projects will be deployed on the islands of Tutuila and Aunu'u. The other two BESS projects will have capacities of 5MW/10MWh and 1MW/2MWh.
