

## Slovenia's power generation supporting energy storage policy

Slovenia: HSE to deploy 590MW PHES and State-owned utility and power generator HSE is targeting 800MW of flexibility assets across Slovenia by , including pumped hydro energy storage (PHES) and battery energy storage systems (BESS). Slovenia adopts updated Integrated National Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan. Slovenia targets 800MW energy storage by with HSE's Slovenia's state-owned utility HSE is driving the country's energy transition with the deployment of 800MW of energy storage by , including 590MW of pumped hydro energy Slovenia Technological Innovations and Social Integration as part of its strategy to increase energy self-sufficiency and independence. The ongoing debate on building a second unit at the Krsko Slovenia state-aid for BESS, renewables gets EU June 15, : The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage and renewables in Slovenia. Production and storage of energy SloveniaWhy is Slovenia rethinking its energy policy? energy policy and seek alternate sources. Slovenia does not have gas storage facilities,with companies dependent on infrastructure in Austria and ENERGY STORAGE ECONOMICS SLOVENIA Our model suggests that there is money to be made from energy storage even today; the introduction of supportive policies could make the market much bigger, faster. POWERING THE FUTURE SLOVENIA'S INNOVATIONS IN Energy storage connectors provide a safe, reliable and efficient connection between energy storage systems and other electrical devices. They are used in home storage system, solar Slovenia's Energy Storage Solutions: Ensuring a StableThis capability is especially important in Slovenia, where the energy landscape is increasingly dominated by renewable sources. By implementing effective energy storage Slovenia: HSE to deploy 590MW PHES and 150MW BESS by State-owned utility and power generator HSE is targeting 800MW of flexibility assets across Slovenia by , including pumped hydro energy storage (PHES) and battery Slovenia adopts updated Integrated National Energy and Climate Slovenia targets 400 MW in BESS, 100 MW in electrolyzers and more pumped storage in the updated Integrated National Energy and Climate Plan. Slovenia Since the change in government, Slovenia accelerated efforts to increase power generation from renewable sources, including solar and wind energy. The PM Golob EUROPE Continued Strength in the Energy Trilemma and Technological Innovations and Social Integration as part of its strategy to increase energy self-sufficiency and independence. The ongoing debate on building a second unit at the Krsko Slovenia state-aid for BESS, renewables gets EU green light - Energy June 15, : The European Commission said on June 9 it had approved a EUR150 million (\$163 million) state-aid scheme to develop battery storage and renewables in Slovenia. POWERING THE FUTURE SLOVENIA'S INNOVATIONS IN ENERGY STORAGEEnergy storage connectors provide a safe, reliable and efficient connection between energy storage systems and other electrical devices. They are used in home storage system, solar Slovenia's Energy Storage Solutions: Ensuring a StableThis capability is especially important in Slovenia, where the energy landscape is increasingly dominated by renewable sources. By implementing effective energy storage
