

Solar panel rush installation

Can a contractor install a solar panel on a roof? A contractor installs a solar panel on the roof of a home. Uncertainty over the future of a 30% federal tax credit has some homeowners rushing to get panels hooked to the grid before Trump becomes President. The solar power industry is growing fast, accounting for more than half of all new electricity on the grid last year. How much does it cost to install solar panels? Installing home solar panels is costly. According to the clean energy company EnergySage, the average rooftop solar installation costs around \$29,000 before tax credits. The credit cuts 30 percent of that cost, making installation feasible for many families. How long does it take to install solar panels? With typical solar installations taking two to three months and high demand expected as the deadline approaches, you need to act quickly to secure this incentive. Installing solar panels can dramatically reduce or eliminate your monthly electric bills while powering your home with clean, renewable energy. Should you install solar panels yourself? You can install solar panels yourself, but doing it alone involves risks--especially when working against a deadline. Incentives can drastically lower your overall cost, but solar is still a big investment. To save money, it's no surprise that many homeowners consider a DIY approach. When should I start installing solar panels? Start immediately: With typical installation timelines of two to three months and high demand expected before the tax credit expires, starting your solar journey as soon as possible gives you the best chance of meeting the year-end deadline. Is a DIY solar panel installation a good idea? A DIY solar panel installation is not the best option if you still rely on utility energy, which most people do. Installing solar panels without the proper expertise can lead to major issues that may cost you more in the long run. Why homeowners are suddenly rushing to install rooftop solar

Kristen Moe stood on her lawn and watched as installers from Lumina, a local solar company, carefully lifted several solar panels onto the roof of her one-story home in Kensington, Maryland. Rush, NY Solar Installation | Sunrise Solar
