

## Spanish new energy storage box

Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal energy storage, and battery systems. Spain approves new decree to accelerate storage and grid Spain's Council of Ministers has approved a royal decree to promote energy storage, accelerate electrification, and tighten oversight of the national grid, says the Ministry for the European Commission approves new 700 million aid scheme to The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities Spanish governemnt approves new decree to boost energy storageThe new regulation, which integrates several measures from the so-called "Anti-Blackout Decree," aims to promote energy storage, modernize infrastructure, and accelerate Spain's EUR700 Million Plan to Boost Energy Storage Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity. This plan will add 2.5 to 3.5 gigawatts (GW) of storage. It includes pumped hydro, thermal Spain Launches EUR700 Million Energy Storage Scheme to The scheme aims to deploy between 2.5 and 3.5 gigawatts (GW) of new storage capacity, enhancing the flexibility and resilience of the national power system while enabling Spain Strengthens Energy Storage Framework to Accelerate Spain's new decree on energy storage in Spain sets a 22.5 GW target by , boosting grid resilience, hybrid projects, and industrial electrification. 5th Solar Energy Storage Future Spain To further this goal, the Spanish government has allocated 150 million euros to support energy storage projects integrated with renewable energy installations and launched the first tender for such Major Breakthrough in Spain's Energy Storage The Spanish government approved Royal Decree 7/ on June 24, resolving several long-standing obstacles hindering the secure and lawful deployment of energy storage projects. Spain offers EUR 700m in aid for large-scale The call is open to proposals for stand-alone battery systems, thermal storage, pumped-storage hydro and projects designed to hybridise storage with new or existing renewables. Brussels approves a Spanish state energy transition planThe objective of the plan is to provide investment support for the deployment of large-scale energy storage. This will ensure independence from fossil fuel imports and greater Spain approves new decree to accelerate storage and grid Spain's Council of Ministers has approved a royal decree to promote energy storage, accelerate electrification, and tighten oversight of the national grid, says the Ministry for the European Commission approves new 700 million aid scheme to boost energy The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities Spain's EUR700 Million Plan to Boost Energy Storage and Spain has launched an ambitious EUR700 million (around \$796 million) program to increase its energy storage capacity.
