

## The largest home energy storage

---

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. The state approved a plan to convert the land into one of the nation's largest battery energy storage systems. Gov. Kathy Hochul wants New York to get the majority of its energy, from clean sources like solar, by 2030. But since the sun isn't always shining, so-called "BESS" sites are critical for reliability. NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. When built, the facility will be able to hold up to 100 megawatts (MW) and power over tens of thousands of households. Once Con Edison will place the largest battery system in New York City into service, increasing reliability in northeastern Staten Island just in time for the summer heat season, the company's president said this morning. The system, which is at a substation in the Fox Hills area, can hold 7.5 megawatts. In conjunction with Orange and Rockland Utilities (O&R), a wholly owned subsidiary of Consolidated Edison (ConEd), Sunrun has successfully activated the largest residential power plant in New York State, comprised of more than 300 solar + storage systems. According to Sunrun, the aggregated home energy storage system quietly shuttered Swiftsure, a planned 650-megawatt energy storage system on Staten Island. The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a mystery why Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help meet summer electricity demand peaks. The installation is a 7.5-MW/30-MWh system located at a substation in the Fox Hills area. One of the nation's largest battery energy storage sites is coming to life. One of the country's largest battery energy storage sites is about to be built on Staten Island, but families say by the time they learned of the plan, it was already a done deal. NYCEDEC Advances Green Economy Action Plan with Support of NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. New Con Edison Battery System Is the Largest in Con Edison is planning a microgrid at a substation on Cedar Street in New Rochelle that will include a 4-megawatt/12-megawatt hour storage system. The project will include direct-current fast chargers. Sunrun creates New York's largest residential Boasting more than 1 million customers and 116,000 installed storage systems, Sunrun is the nation's largest developer of residential clean energy systems. The company is responsible for nearly half of all new residential solar installations in New York City. New York City is about to get its largest battery storage installation. When New York City's largest battery storage installation is complete, it will be able to power more than 10,000 households during peak demand periods. It will also be the region's first such existing power plant. New York's Largest Battery Project Has Been Canceled. The biggest battery project in New York has been canceled in a major victory for the nascent nationwide grassroots movement against energy storage development. It's still a New York City Set To Receive Largest Battery When the battery storage project becomes operational.

## The largest home energy storage

---

operational, it will stand as the largest battery storage installation in New York City, capable of powering over 10,000 households during peak demand periods according to Support of Major Battery Energy Storage Project in New York CityNYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. One of the nation's largest battery energy storage sites is coming to New York City. One of the country's largest battery energy storage sites is about to be built on Staten Island, but families say by the time they learned of the plan, it was already a done deal. New Con Edison Battery System Is the Largest in New York CityCon Edison is planning a microgrid at a substation on Cedar Street in New Rochelle that will include a 4-megawatt/12-megawatt hour storage system. The project will be completed in 2024. Sunrun creates New York's largest residential virtual power plantBoasting more than 1 million customers and 116,000 installed storage systems, Sunrun is the nation's largest developer of residential clean energy systems. The company is New York City is about to get its largest battery storage projectWhen New York City's largest battery storage installation is complete, it will be able to power more than 10,000 households during peak demand periods. It will also be the New York City Set To Receive Largest Battery Storage Project When the battery storage project becomes operational, it will stand as the largest battery storage installation in New York City, capable of powering over 10,000 households according to Support of Major Battery Energy Storage Project in New York CityNYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. New York City's Largest Battery Energy Storage System Nears Con Edison President Matthew Ketschke reported that his company will place the largest battery energy storage system (BESS) in New York City in service just in time to help Energy Storage for New York State Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon emissions. One of the nation's largest battery energy storage sites is coming to New York City. One of the country's largest battery energy storage sites is about to be built on Staten Island, but families say by the time they learned of the plan, it was already a done deal. Energy Storage for New York State Smart, affordable, and resilient: New York State is investing in energy storage systems to help modernize the electric grid and reduce carbon emissions.
