

## U.S. Battery Energy Storage Project Plan

Developers currently plan to expand U.S. battery capacity to more than 30 gigawatts (GW) by the end of 2025, a capacity that would exceed those of petroleum liquids, geothermal, wood and wood waste, or landfill gas. The projects, with a total contract value of \$3.2 billion, will primarily serve the growing demand from data centers. Star Charge Americas, an Ohio-based manufacturer of battery storage systems, EV charging equipment, and microgrid solutions, has partnered with New Jersey-headquartered Looking for the Latest United States Battery Energy Storage Project Database? Battery energy storage is rapidly transforming the U.S. power landscape. In 2024, utility-scale battery storage is projected to expand by a record 18.2 GW, following a historic 10.3 GW added in 2023. These systems play a U.S. battery storage capacity has been growing since 2015 and could increase by 89% by the end of 2025 if developers bring all of the energy storage systems they have planned on line by their intended commercial operation dates. Developers currently plan to expand U.S. battery capacity to more than 30 GW by 2025. This investment is expected to create 350,000 jobs by 2025. Through this investment, the industry is committed to supporting American battery manufacturing leadership, ensuring low-cost affordable electricity to fuel economic growth and American energy dominance. A pro-business Global energy storage capacity was estimated to have reached 36,735MW by the end of 2023 and is forecasted to grow to 353,880MW by 2030. The US had 5,310MW of capacity in 2023 and this is expected to rise to 27,873MW by 2030. Listed below are the five largest energy storage projects by capacity in 2023. Star Charge plans 32 GWh of battery storage projects in USStar Charge Americas, an Ohio-based manufacturer of battery storage systems, EV charging equipment, and microgrid solutions, has partnered with New Jersey-headquartered Top 7 Battery Energy Storage System (BESS) Projects in the US Discover the largest battery storage projects in the U.S. for 2023, including Darden, Bellefield, and Swiftsure. U.S. battery storage capacity expected to nearly double by 2025. Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be in Texas. U.S. Energy Storage Industry to Invest \$100 Billion in 2024 Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project Star Charge plans 32 GWh of battery storage projects in USStar Charge Americas, an Ohio-based manufacturer of battery storage systems, EV charging equipment, and microgrid solutions, has partnered with New Jersey-headquartered U.S. battery storage capacity expected to nearly double in 2025. Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be in Texas. U.S. Energy Storage Industry to Invest \$100 Billion in 2024 Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project Battery Storage Projects in the US Here is a map of all utility-scale battery storage projects in the US. Hover over a battery storage project to view information on each project like their name, capacity and construction date. U.S. Department of Energy Selects 11 Projects to Advance Those selected projects will retrofit, expand, and build new domestic facilities for battery-

## U.S. Battery Energy Storage Project Plan
