

UK invests in energy storage charging stations

Two leading UK-based energy firms, AMP Clean Energy and Pulse Clean Energy, have announced major investment milestones in August, securing a combined total of over £495 million to expand their Battery Energy Storage System (BESS) operations across the country. A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in 40 years.

Long Duration Electricity Storage

Two leading UK-based energy firms, AMP Clean Energy and Pulse Clean Energy, have announced major investment milestones in August, securing a combined total of over £495 million to expand their Battery Energy Storage System (BESS) operations across the country. These investments signal growing The UK's battery storage sector is charging ahead at an incredible pace. Since 2015, operational capacity has increased by 509%, climbing from 1,128 MW to 6,872 MW in 2023. So far this year, more than 1,405 MW of new capacity has been commissioned, already beating the total for 2022 and putting the UK on track to become the world's largest battery storage market by 2025.

In this week's Charging Forward, TotalEnergies has acquired a pipeline of two battery storage projects from Low Carbon, alongside eight solar farms. Elsewhere, an offer from Drax Group to buy the battery Zenobe Energy is the largest independent owner and operator of battery storage in the UK. It buys and manages grid-scale batteries for its commercial customers, such as utilities and electric-vehicle operators.

Highview Power's CRYOBattery delivers, clean, reliable, and cost-efficient long-duration

NatPower UK, a subsidiary of the NatPower Group, has unveiled plans to invest \$10 billion (US\$12.8 billion) in the UK battery energy storage sector by 2025. This massive investment aims to bring online over 60GWh of capacity, marking a significant step towards a cleaner and more sustainable energy
