If I want to speak of North, South, East, West in a general sense I could, for example, use the term cardinal direction. Which term is appropriate to sum up horizontal and vertical in the A word to describe vertical and horizontal movement? Orthogonal does not imply horizontal and vertical movement. Orthogonal implies that one movement is at a right angle with respect to the other. Horizontal and diagonal Split horizontally or vertically - which one is which? 2 'Horizontal' means 'relating to the horizon', so strictly speaking whether a split is vertical or horizontal depends on its orientation relative to the ground. Or less strictly, What is the correct punctuation after "as follows"?
